ENEMIES OF GRAVITY

# Welcome to 3.0

We are determined to make each step extraordinary. We listen to our customers and take on board their feedback. As amazing as the Derby construction is, we always want it to be better. Below are a few nice little improvements we've made to keep our Derby construction going strong

## 1. New last and pattern refinements

To continue to improve the sleekness of our design, we've made some minor last and pattern adjustments to improve proportions for an overall sleeker look.

## 2. New outsole

As a consequence of our new branding, we took the opportunity to re-examine our outsole designs for durability and anti-slip. The newly branded outsole is a full piece of durable rubber protecting a shock absorbant EVA midsole for better durability and anti-slip while maintaining the cushioning support of EVA.

## 3. No eyelets

We've removed the eyelets on the Derby and the Sidecut to bring them inline with the visual language of the Punch and Slingback.
