

WINONA
Synergy

— WINONA INTRODUCES —

SYNERGY

Symbolic of creating harmony whilst embracing diversity;

2020 marks a new year of a brand-new decade, inspiring an extra air of renewal and a perfect opportunity to adjust your outlook with 20/20 clarity. On a global scale connectivity is easier than ever, however as a society we are becoming more disconnected than ever. To bring back unity, what was previously achieved through uniformity, is redefined by embracing differences to achieve harmony, or as we like to refer to it, synergy.

At first glance SYNERGY appears as an effortless collaboration of diverse colours and textures, but when delving deeper you discover true uniqueness within each design.

Throughout this collection WINONA heroes each individual piece, masterfully curated with intention to push and redefine boundaries within your style spectrum. We invite you to step outside your comfort zone and style yourself with an open outlook, just as we have done by dancing past the edge of ours.

WINONA has taken a fresh approach with this collection as we continuously expand our imagination and dare to be daring. What never falters however is the core essence of WINONA; a passion for expressing creativity whilst delivering quality and innovation. Fashion trends come and go and although fads can be fun, we value functional fashion that embraces progressive change and evolution. A tried and true foundation of embroidered cotton, linens, and florals maintain that fond WINONA familiarity, however exploring the scope of these elements is where design goes beyond artistry and becomes design with intelligence. Varied visual elements combine with multifaceted hand feel to stir multiple senses and make dressing an experience. Spotlight on sequins have seen them evolve from strictly special occasion, to making an occasion special. Dress them up or down, there's only one rule; there are no rules. WINONA prides itself on a continuous contemporary approach to style and hopes SYNERGY not only inspires style on a superficial level, but to a deeper sense of self.

WINONA celebrates femininity and however you best channel yours, there is no right or wrong to self-expression. Each piece experiences a style journey starting with design with intention, cut with purpose and detailed beyond decoration. It then awaits the wearer to stamp their signature to complete the process through individual interpretation. With WINONA girls now found worldwide, we pride ourselves on creating a community that not only contributes to, but prioritises global unity.

We exist in a colourful world where colour should not compete, a rainbow epitomises how breathtaking colour can be in unity. The concept of colour is defined through individual perception; therefore we invite you to visualise each design with a newfound approach and assure you that an incredible colourful SYNERGY awaits.
